**WATER, WATER, EVERYWHERE
(NOR ANY DROP TO DRINK)**
from The Rime of the Ancient Mariner

PDHs to be offered to NYS Professional Engineers

TOPICS may include the following:

This year's **annual Energy & Resources Conference** will examine a resource of growing concern across the U.S. and the World: **Water**. In fact, many experts in the field have predicted water to be **the Next "Oil"**.

The conference will examine the following water issues, for both the New York area and the world community:

- **Water Supply Issues**
- **Global Water Sustainability**
- **Water Purification Technologies**

- **Global Water Sustainability**
- **New York City's Water Supply**
- **Water Issues on Long Island**
- **Water Supply in Developing World**
- **Ultrapure Water**
- **Tutorials - Desalination / RO**
- **Steam Condensate Re-Use**
- **Water Conservation**

The developments that have made high-quality water a modern reality will be examined, as well as those breakthroughs that still need to be made.
